High Performance
Hand-held Barcode Scanner

This general-purpose, high-performance hand-held barcode scanner caters to most 1D barcode scanning needs.
Product Features

- **Durable and Easy to Operate**

    The ergonomic design, superior performance and ease of use make it ideally suited for various applications such as retail, logistics, office automation and many more. With a scan speed of 300 scans per second and a scan distance of more than 30cm, it is a solid (state) alternative to hand-held laser scanning.
- **Cutting-edge Technology**

    Its core technology **UIMG®** is independently developed by Newland Auto-ID, comprising optical system, digitizer, decoder, image processor and embedded system. The device delivers an unprecedented decoding capability on 1D symbologies. Users can create their own apps with our development tools to identify particular images and symbols.
